Shiyam Sundar S

Security Operations Analyst | SIEM & Detection Engineering | SOAR Automation | Incident Response
Chennai, India | +91 73582 13132 | shiyamsundarsuresh@hotmail.com | LinkedIn

SUMMARY

Security Operations Analyst with 3 years of experience across SOC monitoring, SIEM detection engineering, SOAR automation, incident response and penetration testing at Zoho Corporation and FinnUp Solutions. Builds MITRE ATT&CK-aligned detections, triages and investigates alerts across endpoint, network and email telemetry, and automates response workflows with Python and REST APIs. Brings an attacker's perspective from offensive security work, an M.Tech in Cybersecurity, and working knowledge of ISO 27001 and NIST.

TECHNICAL SKILLS

SIEM & Detection: Wazuh (rule writing), Splunk (SPL), Elastic / Kibana (KQL), MITRE ATT&CK, detection rule development and tuning, log analysis, YARA, Suricata, Sysmon, Windows Security logs, Linux logs (auditd, syslog), EDR, firewall and IDS/IPS logs
SOAR & Automation: Splunk SOAR (Phantom), n8n, Python, PowerShell, SQL, REST APIs, JSON, XML/SOAP, regex, Git, playbook development, API integration
Incident Response: Alert triage, incident investigation, root cause analysis, threat intelligence, phishing analysis, email security (SPF, DKIM, DMARC), DNS monitoring, playbooks and runbooks, MTTD / MTTR
Offensive Security: Vulnerability assessment, penetration testing (network, web, wireless, API), Burp Suite, Nessus, OpenVAS, Metasploit, Nmap, Wireshark, malware analysis, API security, WAF
Governance & Risk: ISO 27001, NIST, SSDLC, secure coding, threat modeling, risk assessment, security controls, code reviews
Product & Delivery: Roadmapping, PRDs, user personas, Agile, Jira, Confluence, Figma, cross-functional stakeholder management
AI & Cloud: OpenAI APIs, LLMs, Ollama, PyTorch, Microsoft Azure fundamentals, AWS cloud security

WORK EXPERIENCE

Assistant Professor (Cyber Security), St. Joseph's College of Engineering, Chennai — Aug 2026 — Present
- Teach cybersecurity to undergraduate CSE students and run hands-on CTF workshops; secured the college website and mentored student hackathon teams, with three teams selected.

Cybersecurity Analyst & Product Manager, FinnUp Solutions — 2025
- Executed external and internal penetration tests across FinTech SaaS APIs and developed custom Python scripts for exploit automation.
- Built automated vulnerability triage using Python and REST API integrations between Burp Suite and Jira.
- Owned the end-to-end product roadmap for FinTech SaaS offerings, translating customer feedback and technical insights into prioritized features.

Associate Product Manager, Zoho Corporation, Chennai — 2024
- Partnered with security engineers and developers to integrate security controls into feature sprints and Agile pipelines.
- Conducted risk assessments for new features, covering secure authentication flows and API access controls.
- Championed Agile security practices, aligning business goals with secure development processes.
- Delivered user-centric improvements that increased product adoption and reduced potential abuse vectors.

Security Operations Analyst, Zoho Corporation, Chennai — 2023 — 2024
- Designed MITRE ATT&CK-aligned SIEM detection rules across enterprise platforms, increasing detection accuracy by 25%.
- Designed SOAR automation workflows and playbooks, improving mean time to detect and respond (MTTD/MTTR) by 30%.
- Monitored and triaged SIEM alerts in a 24x7 rotating-shift SOC; investigated suspicious activity and anomalies and performed root cause analysis to determine the source of threats and their impact on infrastructure.
- Fine-tuned detection rules and incident response workflows to reduce false positives; wrote and updated playbooks and runbooks and managed tickets and shift handoffs.
- Led investigations and strengthened email security through SPF/DKIM/DMARC validation, phishing simulations and awareness training.
- Worked with cross-functional teams to remediate vulnerabilities and implement security controls in line with organizational policies; supported enterprise DNS monitoring and anomaly detection.

Cyber Security Analyst, Zoho Corporation, Chennai — 2022 — 2023
- Conducted network, web and wireless penetration testing; exploited critical CVEs and simulated malware infection vectors.
- Used Metasploit, Nmap, Wireshark and Burp Suite for exploitation, malware payload analysis and packet inspection.
- Assessed the efficacy of existing security controls by exploiting discovered vulnerabilities, giving actionable input for strengthening defenses.
- Authored vulnerability assessment and threat reports with mitigation and remediation guidance for high-risk findings.

EDUCATION

M.Tech, Cybersecurity Systems and Networks, Amrita Vishwa Vidyapeetham, Amritapuri, Kerala — Jun 2021 — Jun 2023
- Thesis: designed a function-locking mechanism to prevent smart contract reentrancy attacks. Coursework: reverse engineering, malware analysis, PE structures.

B.E, Computer Science, Prince Dr. K. Vasudevan College of Engineering & Technology, Chennai — Jun 2017 — Jun 2021

CERTIFICATIONS

Microsoft Azure Fundamentals (Microsoft) | AWS Cloud Security (AWS)
